OBJECTIVE

Software Engineer with over one year of experience in web development, seeking a full-time role in web development.

EDUCATION

Bachelor of Computer Science, SRM University 2018 - 2022
Specialized in Big Data Analytics with 8.5 CGPA

+2 computer science , Love Dale Residential School 2017 - 2018
With 6.8 CGPA

10th , Love Dale Residential School 2015 - 2016
With 9.2 CGPA

SKILLS

Technical Skills	Java, JSP, jQuery, JavaScript, React, Node, MongoDB, Rest API, MySQL, SQL
Soft Skills	Communication, Teamwork, Adaptability, Leadership, Creativity, Critical thinking,

EXPERIENCE

SOFTWARE DEVELOPER Jun 2023 - Jun 2024
Ramachandran Retail PVT LTD *India, Kerala*

- Developed and maintained a comprehensive SAP system.
- Designed and implemented a new self-billing system (KIOSK).
- Developed a tracking system for management to monitor total incoming goods, sales, and wastage.

PROJECTS

Accident location prediction system analysis. The module comprises AI and ML technologies that predict the probability of an accident occurring at a particular time and place, dependent on various factors such as weather, road conditions, traffic, and others. Support was received from the Kerala Police for collecting real-time data.

Hyperspectral image classification using transfer learning This project involves the direct acquisition of satellite images to classify them based on quality and description. The model is trained to classify the data accurately and utilize it accordingly.

INTERNSHIP

- **KOMPETENZEN TECHNOLOGIES** Completed an full stack development course. Worked with Java servlet method, MVC from Sep 2022 - Jun 2023
- **MOZANTA TECHNOLOGIES** Assisted team with java full stack development as an complete intern from July 2022 -Aug 2022

PUBLICATION

- Road accident analysis in Kerala and location based security level classification using decision tree algorithm, certificateid:PA2214, ISSN NO:0090-5674
- A unified approach for hyperspectral image classification using transfer learning
